carbonyl reductase (NADPH2) (EC 1.1.1.184) - Candida magnoliae
N;Alternate names: aldehyde reductase 1; NADPH-dependent carbonyl reductase
C;Species: Candida magnoliae
                                                                             A;Molecule type: protein
A;Residues: 2-25;79-83;107-124;125-134;149-152;169-189;204-228 <YA2>
C;Genetics:
A;Gene: S1
C;Superfamily: ribitol dehydrogenase; short-chain alcohol dehydrogenase
C;Keywords: carbohydrate metabolism; oxidoreductase
                                                                                                                                                                                                    A,Cross-references: UNIPROT:Q9C4B3
